For Indigenous Peoples around the world, recognizing rights of nature has always been part and particle of their worldview of living in harmony with nature.

Rather than treating nature as property under the law, rights of nature acknowledges that nature in all its life forms has the right to exist, persist, maintain and regenerate its vital cycles.

With Rights of Nature, we -the people- have the legal authority and responsibility to enforce the rights on behalf of ecosystems. The ecosystem itself can be named as the defendant.
